Fall Courses

Other ERM courses offered based on faculty availability (e.g., Evaluation of Educational Programs, Survey Research Methods, IRT, etc.). Time TBD, although many courses are offered at 4pm.

HHS [Semester/time/day of offerings are based on faculty availability]

HHS 600 Qualitative Research Methods for Consumers 3

Foundations of qualitative methodology, exploring the history, philosophy, and epistemologies of qualitative research.

HHS 601 Qualitative Research Methods for Producers 3

The specific focus is on the choice of methods used in the construction of qualitative research. Students practice selecting and collecting qualitative data.

HHS 625 Research Methods in the Health and Human Sciences 3

Research methods and designs for the study of families and individuals across the lifespan. Focus is on application of method to research in the health and human sciences.

HHS 630 Survey Design: Health and Human Sciences 3

Survey design and implementation applied to problems in health and human sciences. Topics: maximizing response rates; selecting/writing/evaluating questions for different populations; reliability; validity; layout; modes of survey administration.

HHS 650 Applied Multiple Regression 4

Applied instruction on the theoretical underpinnings and assumptions of multiple regression analysis and the valid implementation of this statistical model in testing of meaningful and nuanced research questions and hypotheses. Prerequisites: ERM 680, STA 571, PSY 609, or permission of instructor.

HHS 702 Professional Grant Writing for Community Organizations 3

Theoretical and applied avenues to learning Professional Grant Writing for Health and Human Service Organizations in the Community. Prerequisites: Enrolled graduate students in the School of HHS, or permission of instructor. Notes: Same as HEA 702.

HHS 745 Cluster and Mixture Modeling 3

Theoretical underpinnings and assumptions in the application of finite mixture modeling in the study of health behavior, formulation of research questions, and strategies for reporting of results. Prerequisites: HHS 650 or NUR 702 or ERM 681 or permission of instructor.

HHS 746 Applied Longitudinal Analysis 3

Theoretical underpinnings and assumptions of statistical techniques for the analyses of data from longitudinal designs, formulation of research questions, and strategies for reporting of results. Prerequisites: HHS 650 or NUR 702 or ERM 681 or permission of instructor.
