Tentative Semester Schedule for HDFS Graduate Courses 2025 - 2028

Course	F25	S26	F26	S27	F27	S28
640 Professional Seminar I (1 credit)	X		X		X	
651 Contemporary Research in Human Development	X		X		X	
652 Theories of Human Development & Family Studies	X		X		X	
658 Research Methods in HDFS (HHS 625)	X		X		X	
661 Professional Seminar II (2 credits)		X		X		X
653 Contemporary Research in Family Studies		X		X		X
656 Race, Class, and Culture		X		X		X
750 Professional Seminar III (3 credits)	X		*		X	
756 Advanced Research Design in HDFS		X		X		X
703 Parents' Work and Family Relationships (FS)						
703 Families and Health (FS)						
703 Risk & Resilience in Children and Families (FS)		X			X	
723 Divorce, Remarriage, Cohabitation (FS)						
726 Close Relationships (FS)						
721 Parent-Child Relations (FS)				X		
703 Contemporary Research in ECE (HD)						
725 Psychobiology and Family Processes (HD)						X
713 Social and Emotional Development (HD)		X				
714 Cognitive Development in Young Children (HD)			X			
715 Infant Development (HD)						
716 Seminar in Adolescence (HD)						
730 Child Development in Cultural Context (SC)						
703 Children, Poverty, and Public Policy (SC)	X					X
703 Immigrant Families (SC)						
703 African American Families (SC)						
703 Minority Youth in Urban Contexts (SC)			X			
740 Social Justice Research with Diverse Families (Qual)	X					
703 Measurement Analyses and Methods in HDFS (MPlus & R)			X			

Key:
Required Core/MS Courses,
Required Doctoral Courses,
FS Elective Offerings,
HD Elective Offerings,
SC Elective Offerings, HDFS Stats/Methods

SC = doctoral specialized elective in Sociocultural

HD = doctoral specialized elective in Human Development

FS = doctoral specialized elective in Family Studies

*Students with Fall 2026 HDF 750 POS plans should adjust their POS to take HDF 750 in Fall 2027

Tentative Semester Schedule for HDFS Graduate Courses AY 2025-2028

ERM & HHS Statistics/Methods Course Offerings

ERM*

Spring Courses
ERM 667 Introduction to Measurement Time TBD
ERM 675/775 Data Viz Time TBD
ERM 681/781 Stat II usually Tuesday, 4pm
ERM 731 SEM Time TBD
ERM 745 Culturally Responsive Approaches to Research

Fall Courses
ERM 680/780 Intermediate Statistical Methods, usually Tuesday at 4
ERM 682/782 Multivariate, usually Tuesday at 4
ERM 685/785 R, Usually Wed at 1
ERM 732 HLM Time TBD
ERM 650/749 Foundations of Qualitative Research Methods Time, Usually Monday at 4
Other ERM courses offered based on faculty availability (e.g., Evaluation of Educational Programs, Survey Research Methods, IRT, etc.). Times TBD

*All HDFS PhD/doctoral track students should register for the 700 level ERM section of the courses above (for those courses that have both 600 and 700 level options).

HHS [Semester/time/day of offerings TBA are based on faculty availability]

HHS 625 Research Methods in the Health and Human Sciences 3 [offered every Fall]
Research methods and designs for the study of families and individuals across the lifespan. Focus is on application of method to research in the health and human sciences.

HHS 626 Quantitative Research Methods I: An Introduction 3 [offered every Spring]
Provides comprehensive training in fundamental quantitative research methods used across social, behavioral, health, and human sciences. Graduate students gain competency in understanding basic quantitative approaches, study design, measurement, and statistical analysis.

HHS 627 Quantitative Research Methods II: Application and Analysis 3 [offered every Fall]
Covers the application of quantitative methods and analytical approaches for students specializing in quantitative research. Students master how to code data, write syntax, analyze data, use software, interpret results, and apply the commonly used inferential statistics and multivariate techniques in social, behavioral, health, and human sciences.

HHS 628 Qualitative Research Methods I: An Introduction 3 [offered every Spring]
Provides an introduction to the fundamental qualitative research methods used across social, health, and human sciences. Graduate students gain competency in basic qualitative approaches, data collection, and analysis techniques, ensuring understanding of human experiences and social phenomena regardless of specialization track.

HHS 629 Qualitative Research Methods II: Application and Analysis 3 [offered every Fall]
Explores sophisticated qualitative methods and analytical approaches for students specializing in qualitative research. Students master advanced analytical techniques, innovative methodological approaches, and community-engaged research and participatory methods essential for conducting rigorous qualitative research in social, behavioral, health, and human sciences.

HHS 745 Cluster and Mixture Modeling 3 (has not been offered recently)
Theoretical underpinnings and assumptions in the application of finite mixture modeling in the study of health behavior, formulation of research questions, and strategies for reporting of results.

HHS 746 Applied Longitudinal Analysis 3 (offered Spring 2026 and Fall 2027)
Theoretical underpinnings and assumptions of statistical techniques for the analyses of data from longitudinal designs, formulation of research questions, and strategies for reporting of results.
